

**Model 822 Large diameter stringing block**

| Order number | Model    | Number of sheave | Rated load(kN) | Weight (kg) | Features                                                |
|--------------|----------|------------------|----------------|-------------|---------------------------------------------------------|
| 10141        | SHDN822  | 1                | 30             | 25          | MC nylon                                                |
| 10142        | SHSQN822 | 3                | 60             | 118         | Middle :cast steel sheave<br>conductor :MC nylon wheel  |
| 10143        | SHWQN822 | 5                | 120            | 180         |                                                         |
| 10146        | SHQ822   | 7                | 120            | 285         | Middle :cast steel sheave<br>conductor : MC nylon wheel |
| 10148        | SHJ822   | 9                | 150            | 445         |                                                         |

. Note :

1. Maximum suitable conductor LGJ630.
2. Block dimension ( outside diameter× root diameter × sheave width)  $\Phi 822 \times \Phi 710 \times 110$
3. 10148 is assembled ,conductor and middle sheave can be separated to lighten the transport weight ,middle steel sheave  $\Phi 520 \times \Phi 400 \times 120$ (mm).
4. we can provide cementation aluminous sheave, MC nylon and strengthened nylon sheave.
